COMMITTEE ON DOCUMENTATION

ASTIA Visit

1. Confirming my telephone message of 13 November, the CODIB visit to ASTIA will occur on Tuesday, 27 November 1962, beginning at 0930 and running about two hours. Col. James O. Vann, the Commanding Officer, will be present; project officer for the visit is Mr. S. Edward Pope, Technical Coordinator (Code 189, ext. 378).

2. Security clearance level required is SECRET; certification of clearances may be sent to Mr. Pope, or, if addressed to the ASTIA Security Officer, Mr. Pope's name should be mentioned to tie the message to the briefing. ASTIA is expecting between 20-25 visitors in our group; thus far, I have received 16 names from six member agencies.

3. There is limited visitors' parking inside the main entrance to Arlington Hall; enter from Arlington Boulevard (Rt. 50) just before reaching the Buckingham Apartments. Doubling up in cars ought to be done to the degree possible. Report to the Reception Desk, Building B and ask for Mr. Pope; names of expected visitors will be held at the Reception Desk.

4. If, by the time this document is received, you have not yet called in to me the names of your attendees, would you please do so.

Secretary

MEMORANDUM

SUBJECT: Demonstration of Machine Translation Operations,
CIA Library, 1 E 41, 1530-1700, Tuesday, 16 October

1. In connection with a demonstration for the forthcoming Second Conference on Intelligence Methods, 15-19 October, machine translation equipment has been installed in the CIA Library (1 E 41) through the cooperation of IBM and the Air Force, for whom this machine translation system is being developed. The equipment consists of two Flexowriters, one with Cyrillic letters, the other with English, and a data-phone transmitter and receiver over which are passed punched-tape Russian-language texts for translation into English by a computer located at White Plains, N. Y. This system is still in the experimental mode but is already used part of the time for production translation to serve the Air Force Systems Command at Wright-Patterson AFB, Dayton, Ohio.

2. This equipment will be in operation on Tuesday, 16 October, between 1530 and 1700, in the CIA Library. You are cordially invited to drop by and observe a highly successful effort to cope with this complex linguistics and computer challenge.
